### **Enviro Edu**

We will be having a visit from the Enviro Edu Program on the 9th December. Below is a brief description of their program

Enviro EDU is passionate about conservation management, particularly in relation to threatened species. We are involved in the captive breeding of a number of threatened reptile and mammal species which will assist in the provision of insurance populations for some of these animals. EnviroEDU offers 'wildlife in the classroom experiences' – a wonderful opportunity for children to get up close and personal (and safely touch and hold) a diverse range of Australia's native and threatened species including:

Reptiles and frogs (hand raised python, lizard, crocodile, turtle and frog species)

Invertebrates (scorpions, stick insects or giant burrowing cockroaches);

Birds – (Tawny Frogmouth, Red-tailed Black Cockatoo or Regent Parrot); and

Mammals (Squirrel Glider, Ring-tailed Possum, fat-tailed dunnart, Brush-tailed Bettong or Spotted-tailed Quoll).

All animals are captive bred, hand reared, tame and therefore accustomed to being around children and adults (they have been surrounded by the love of our two budding little zoologists from a very young age!!)
